CANON EOS 5D Mark II----- a digital camera with good performance by [Wenddymadden](#)

Article published on January 30th 2012 | [Technology](#)

Canon EOS 5D Mark II is a digital camera having superb imaging performance. It is provided with the 21.1 Mega Pixels camera which is highly suitable for grabbing an image in any weather having low or excess light. The camera has got the Digic 4 processor which even has got durable body with rugged design. It has different shooting modes, picture style with Face Detection Technology. The most important thing that it has is Self Cleaning Sensor Unit.

Canon EOS 5D Mark II specifications include a single lens of Digital type that is from Canon EF lenses. It has CMOS sensor which works as Image Sensor. Image formats supported are JPEG, RAW (14-bit Canon original) and simultaneous recording is also possible in it. Storage memory is of type "Type I or II CF card" which should be UDMA compatible.

This camera has got View Finder which is known as Eye-Level Pentamirror having an Autofocus with TTL secondary image-registration and Phase Detection. This camera even has 35-zone TTL full-aperture metering that controls the exposure. Canon EOS 5D Mark II has an evaluative metering that is linkable to any AF point. This Canon EOS 5D Mark II has electronically-Controlled, Focus-plane type of shutter in it. The speed of the shutter is of about 1/8000 sec. to 30 sec. The approximate continuous shooting speed is about 3.9 shots/ sec. It has got LCD monitor with TFT color Liquid-Crystal monitor.

Pointers for canon EOS 5D Mark II reviews

Canon EOS 5D Mark II is first DSLR for having HD 1920x1080 video capturing capacity. Initially the filming starts from Live View mode to final stage when video frame is captured. It has latest 3.0-inch VGA resolution having the wide 170 degree angle-of-view LCD which provides acute clarity focus with playback checks. The brightness of the screen will adjust for suitable viewing conditions which has extended battery life to improve bright conditions viewing. Live View button will immediately display real-time image which makes photographers easy shooting on LCD even for awkward angles. Easy remote shooting is possible with simple PC connection.

Canon eos cameras have 9-point auto focus system which has 6 additional AF points assistants which are located inside the metering circle for optimizing subject tracking in AI SERVO AF mode. This helps to get perfect readings even in dull lightening conditions in which the spot metering mainly covers 3.5 percent frame.

The battery type that works in this camera is of type LP-E6. With this battery user can shoot approximately 850 shots. The dimensions of this camera are of about 6.0 x 4.05 x 3.0 inch with the thickness of 3.0 inch. Its weight is nearly about 810 grams which is available in the Indian market for Rs.151,995/-
