There are so many reasons why purchasing the Canon Powershot A495 are a great choice for you. That is the reason why our Canon Powershot A495 review wants to emphasize the advantages and the disadvantages of this camera. Let us talk about the advantages of the Powershot A495, and it includes the fact that it has a simple design, offers first class image quality for your money, offers reliable auto mode, convenient power source; some control over settings, and fast AF, boasts a nice and clean look; the start-up is like a flash; the result in macro mode is good as long as its flash is off, offers superior results in outdoor lighting, as well as an affordable price.

To add to the previous Canon Powershot A495 review; let us talk about the disadvantages of the Canon Powershot A495. The Powershot A495 also has its own disadvantages, just like any other cameras, and it includes the fact that it has no optical or sensor-shift image stabilization, offers slow recycling, quite small and low resolution LCD screen and can be difficult to see under the bright sunlight, sluggish shooting performance; battery life is relatively short; its lens is not wide enough, slow buffer and screen quality; its movie mode needs a little improvement, and lastly; its shutter lag can be an issue in low light.

Aside from the advantages and the disadvantages of the Canon Powershot A495, our Canon Powershot A495 review also wants to give you a quick detail about its basic specifications. The Powershot A495 offers a 10.0 mega pixel 1/2.3 inches CCD sensor, 3.3x optical zoom lens with a focal length of 37mm – 122mm in the 35mm film equivalent, a 4x digital zoom, 2.5 inches LCD screen with 115,000 dots resolution, ISO sensitivity of Auto and 80 – 1600, no image stabilization, no manual mode, no viewfinder, f/3.0-5.8 aperture range, shutter speed of 15 – 1/200 sec., 0.9 fps continuous shooting, 640 x 480 and 320 x 240 movie clips (both at 30fps), two AA-size batteries, and the compatibility to the SD, SDHC, SDXC, and MMC cards.

Those features stated in the previous Canon Powershot A495 review are available in a small body with measurements of 93.5 x 61.7 x 30.6mm with a weight of 175g. We all know that if you are already familiar to a user-friendly film camera, it is really difficult to learn how to use a point and shoot camera. Why? Of course, there is more to it than pointing and clicking. And that is the reason why the Canon Powershot A495 is more attractive to the starters. It is because this camera has a sleek look with soft edges, and it is coupled with easy operability.

The best thing about the Powershot A495 is that it offers a compact style, making it very ideal for those people who are in search for convenience along with the style. Rest assured that its potential users can truly capture great photos, thanks to its 10.0 mega pixel resolution and 3.3x optical zoom that really doing their job.
