Canon PowerShot S95- Cherish all the moments by [Paul Smith](#)

Article published on January 19th 2012 | [Technology](#)

The Canon cameras are made in Japan, which is known for its superior image quality. Canon cameras are used in mostly all fields from professional photo shoots and can even be carried for holidays. Canon PowerShot S95 is the latest series of camera launched and is well trusted among companies. The specification of the Canon professional, high-end camera includes the features along with sensitivity image sensor. This is a successor to S series of Canon PowerShot which is loaded with latest features. The camera comprises of 10-megapixel image sensor that is larger than the sensors that are typically found in shoot and point cameras with a raw image file format. The advanced image stabilization system will help in getting sharp pictures in inferior lights at ISO up to 3200. The basic dimensions of the camera are 99.8 mm x 58.4 mm x 29.5 mm. The weight of the camera is approximately 193 grams excluding the battery.

Technical specifications of Canon PowerShot S95

The maximum resolution of the camera is 3648 x 2736 i.e. 10 mega pixels in which the camera has a lens of 6.0-22.5mm f/2.0- f/4.9 along the flash of the camera is 50 cm-6.5 m wide and 90 cm- 3.0 m tele. The Canon camera also has mechanical as well as electronic shutter. The speed range of shutter is 1/1600-1 sec in auto mode and 1/1600-15 sec in mechanical mode having the evaluative, centre weight average, spot metering modes features which are fixed at the main centre. The focus areas are also fixed to centre i.e. TTL(9-point AiAF). Single and continuous focus modes are available in auto mode. The Camera has five photo aspect ratios which are 16:9, 3:2, 4:3, 1:1, and 4:5. One can do a continuous shooting with approximately 0.9 frames. One can also control this Canon PowerShot manually too but only for certain settings.

This Canon PowerShot camera works on the auto mode, in day light, cloudy weather, in bright light and also underwater with flash. It has a rear LCD monitor with 3.0 inch TFT colors with approximately 461,000 dots. One can store the images and videos in its secure digital card. This canon camera has a Canon NB-6L LI-Ion battery. If one doesn't have enough battery then it also provides with an additional option of adaptor. One can use AC adaptor Kit ACK-DC40 to charge the battery of the camera. Canon digital cameras price ranges from Rs 25,804. Though they are bit expensive but are worth buying because of its exceptional features.
