Electric Car News is Raising the Hopes of Many Drivers Across the World. by [Adeline James](#)

Article published on June 26th 2012 | [Technology](#)

Having a family of four and planning to buy a vehicle? But the fuel and maintenance cost posing a great problem? But now there is solution to that problem! The electric car news has come up with the biggest news of the year. It has enabled the citizens to retrieve the benefits of a car with a reduced or no dependence on fuel. The incredible electric car news mean that every individual can think of purchasing a vehicle; however the one which propels on electricity.

There are various advantages and disadvantages associated with electric cars. Some of which are clearly highlighted in the electric car blog. The electric car blog says that driving an electric car is the first step towards conserving the nature. They promise 0% carbon emission and an avoidable dependence on fuel and gas. Moreover, in many states the Government is promoting the use of electric cars by providing various tax incentives to the drivers. Other than that, the Government is also providing a rebate for installing a separate meter for charging them. Moreover, concessions are also given in the usage of electricity specifically used for the recharging of such vehicles. You also don't have to worry on the speed and acceleration of the electric cars. Electric cars provided the much needed acceleration and excellent smoothness while driving and you can also get rid of the spoilt noise of the engine!

Just like the two sides of coin, electric cars too have certain disadvantages. The greatest limitation being that they cannot large distances in one charge. It can run a maximum of 120 miles if driven approximately at 38 miles per hour. Which means you would have to restrict your movements within short distances. Another major issue striking electric cars are the recharging stations. Once an individual invests in an electric car, he either has to depend upon the public EV charging stations or install an electric charger for themselves according to their convenience. This calls for a further expenses and maintenance cost. However, as these cars get more popular with time more facilities would be made available to the citizens.

The hybrid cars news came with no less shock! According to the hybrid cars news, hybrid vehicles are available in different types to suit the various needs of the commuters. They are mostly differentiated on the basis of their configurations. To name a few, they are parallel hybrid, mid parallel hybrid, Series parallel hybrid and so on. All such hybrid car feature a small fuel-efficient gas engine combined with an electric motor that assists the engine when accelerating. Hybrid Auto Moto guides the customer in the best direction and helps them choose the best vehicle which suffice their requirement optimally!
