Article published on April 19th 2012 | [Technology](#)

If you have an android device you can make your life a lot easier if you are in the business, you can enhance your business productivity while you are on the go, cloud storage and collaboration platform has just released android apps to the android market. And for those who want to get the most can get the apps and they can be helped to navigate the big apple.

Various android application reviews information about apps installed in the androids and allows to store and back up the list also it helps to manage the application and recover of the application. It also has some special features that make it unique such as, it displays a list installed applications, sharing list by twitter, copies data, searches your favourite applications from the android market and these features makes it a best practise to use. As the launch application lock for the first time and the app's main page displays a list of memory sources.

A face book messenger is another feature that lets you send messages instantly and lets you chats with friends who are on face book, create group conversations for making plans on the go. It becomes important when you read the monitoring android application reviews as it is a great product and it is effective and responsive. The android monitoring software review provides you with all the information and it is high market with its effective enforcement. Skype android reviews provide the Skype to Skype video calls at Skype rates. And it features video calling is now supported more on android devices.

You should also externalize your android resources so that you can maintain them independently and it also allow you to provide alternate resources that support various device configurations like languages size of the screen as it becomes important as more android powered devices available with different configurations. Providing resources help you organize what kind of resources you can provide in your app and how to use those resources provided.

There are various other kinds of android resources such as developer resources, technical resources, various articles and tutorials those fully functioning sample applications that you can build and run to learn about how these resources work with these applications. If you have an android device in need of applications there is a list of wide range of apps including popular games.
