The Specifications of Dewalt 14.4v Battery by [James Blee](#)

Article published on April 6th 2012 | [Technology](#)

The requirement of electronic items in our lives to make it smooth is more than what you can actually calculate. But in order to have them working properly, you need batteries that have good power and can run those devices and machineries smoothly. Dewalt is a very well known name in the world of batteries and there is not much competitor of the brand in the market. The company is known for improving their standard continuously as for them their competition is Dewalt itself. The dewalt 14.4v battery in an example of the continuous improvement and it is quite effective in use.

dewalt 14.4 battery is being sold by all major dealers in battery in the market today. There are things that are unique for the brand and the specification. This battery can run all the tools that require 14.4 volt to operate. The battery pack in this range is especially popular because of the multiple use. This battery has more run time than any other battery. It is specifically 40% more. These are high capacity batteries which are made to last longer. It provides up to 1200 cycles in some of its types. Another good thing about this battery is that the depreciation is less as there is no or very low memory effect.

The dewalt 14.4v battery comes with three years warranty and it can power all the dewalt tools with the same power requirement. No matter what tool is being used by you this battery is going to work great. The performance of the battery is quite good and people are satisfied with the same. The only thing that you need to check when purchasing it is that you are purchasing it from a good dealer that is authentic and would supply genuine product.
