USB Charger : Helpful Tool for Charging Many Kind of Gadgets by [Julia Roger](#)

Article published on July 3rd 2012 | [Technology](#)

The world has witnessed a whooping transformation in different types of gadgets that manufacturers have come out with. There is something common about all these gadgets. Almost every gadget needs an usb charger for charging these them.

Availability of an usb charger in different sizes, shapes and designs have benefitted users in many ways. For instance, the micro version of this charger comes handy especially during driving long distances. You can easily use it in your car for charging an USB enabled device. Because most cars have specially designed ports for this purpose, charging won't be a difficulty job. Before making the final choice, collecting adequate information is crucial. Similarly, your needs will determine the style and look of charger you ought to select.

Features of usb hub have attracted many users. Being light-weight, it becomes very convenient to carry. It can enable USB enabled devices to have direct communications. In computers having just one USB port, it plays a crucial role in expanding capabilities of the USB port. Similarly, it can be used for connecting a printer and keyboard when there is a single USB port.

Special type of usb hub also enables sharing of services between a network having many computers. Its effectiveness has given away the earlier practice of connecting a printer to a computer by following a tedious process involving keyboards, external devices and parallel cables. Small hubs usually come in horizontal format while larger varieties come in vertical format. They are designed in a manner which ensures smooth power supply from mains. In instances, where bus-powered hubs are used, the power is supplied from host computer. When powered from mains, it has capacity of supplying power of 500mA. Whenever you encounter some power problems, the ideal move is to check ratings of the connected devices. There are many low-cost hubs that come compact with a Plug & Play device.
