Enjoy Watching Funniest Joke Videos by [Justjokes](#)

Article published on February 16th 2012 | [Television](#)

Initially, when NASA started sending up astronauts in the universe, they discovered that ballpoint pens would be useless in zero gravity. In order to resolve the issue, NASA scientists spent around a decade and \$12 billion developing a pen that can work in zero gravity, on any surface including glass as well as at temperatures ranging from below 0o C to 300o C.

And The Russians used a pencil.

Rolling On Floor, Laughing!!!

Laughter is the best medicine™ for both, mind and body.
