Medical Care in China - Write Articles by [FRANCES WISE](#)

Article published on August 10th 2012 | [Theater](#)

Write articles in my eight years in the land of the dragons. I saw for myself the quality of care for the chinese. As a teacher back in shanghai. I used to go to the hospital community (the equivalent of a polyclinic in singapore) in my city for basic care. And go to city hospitals for more serious things. Write articles when they need medical treatment in my children went to a local children's hospital. The concept of family doctor or gl (gp) is lacking. Doctors also see tons of patients on a daily basis. And will not be able to build any relationship with the visitors. As polyclinics in singapore. Write articles not only, but they have the irritating habit you want to put a drip every little illness.

And raise your tone all the little tests (including blood test for influenza). Health insurance companies, i have not much choice but to walk in space. His current company gives me health insurance. And thus the world of foreign hospitals. Write articles clinics open to me. Small hospitals that serve the local population (including rich chinese) use the doctors. We got very close to the. Our family doctor, for example. Is also a friend. Write articles as well as. We occasionally go for drinks together. We can communicate in english. And most importantly, we believe the level of care and ethics in medical. Things are complicated, but when it comes to surgery and more complex.

Write articles

I discovered for myself first hand when i took a student who broke an arm to shanghai united family hospital. A few years. The western doctor who saw them remarked. They had to have surgery. And called the pediatrician of the affiliated local hospital. Write articles he explained that foreign doctors are not allowed to practice surgery in china. write articles even if their hospitals are authorized to operate in the nation. And a chinese operation. How bad could it be? in my current school. I did not see themselves as a good pre-school and a teacher - pools of blood all around the entire hospital. Another teacher, whose husband was hospitalized for a heart attack. Was even more shocked. He was allowed in the operating theater. Ungowned. The surgeon wants to use the tools that she saw lying when she entered. And must insist on them opening a new suite of instruments. The middle of surgery. Someone opened the door to the operating room. Ungowned, and then went out. Medical personnel in developed countries suffer attacks by now the reading of such malpractices. Infection is the number one killer in any form of surgery and still atmosphere laissez. Fair prevails within chinese hospitals first and second tier city in china.
