Article published on December 22nd 2011 | [Web Design](#)

Making the websites user-friendly, efficient, attractive, search engine friendly, potential etc, may help in generating leads. All these sounds good, but the major issue that concerns millions of clients is always related to the affordability. The services that are offered to make the websites most effective marketing tool for clients require hefty payments. Moreover, the needy clients also need qualified, talented and experienced web designers, SEO professionals, developers etc, to customize, optimize or design their websites. To make it more precise, the various clients require quality work along with affordability.

Fortunately, there are few companies that offer various web design and WordPress services to provide quality at best price. Such companies are ruling for more than two decades in the market. The web designers have more than decade experience in the industry where they have customized, designed and offered various business templates for WordPress to many small and large scale industries. Making a comprehensive websites which can be used as strong and reliable marketing tool requires deep and extensive knowledge in the e-commerce world.

The web designers are highly skilled in their profession as well as they understand the frequent fluctuations that rise quick and effective customization needs on the websites. As mentioned earlier, WordPress Services for business site are highly demanded expected by every client in the industry today. Therefore, the few companies that offer great packages of Wordpress For Business Site provide three types of options.

Basic, standards and advanced packages that are offered at highly lucrative prices. In the basic packages, clients can have WordPress, customization, web design etc, for the websites. For example in the basic package the clients get link setup for SEO friendly URLs, installs company logo & graphics, web hosting, 2 hours phone support or email support, supporting and guiding in installing latest version of WordPress, database creation for WordPress, Search Engine Optimization plug-ins, making the website fully functional, blog, latest version of WordPress, customized theme, domain registration (if applicable) etc at the most reasonable price that seems most affordable.

The major difference that are provided in advanced and in standards packages are customized unique design for the websites, custom developed WordPress theme, up to 4 hours Phone support & Email Support along with 2 hour Phone or Email training sessions on WordPress. All these and much more are offered in the packages to launch unique, qualitative and most comprehensive website in the market at the most attractive prices liked by the clients.
