Article published on June 13th 2012 | [Web Design](#)

With a logo design company, your business will feature its very own high quality custom designed corporate log. It does not matter if your business is small as it will look big and more professional if your will have your own trademark. Your new logo design will instigate brand loyalty and confidence in the eyes of your customers.

A logo is a unique design, a trademark that reflects the name of your company in the most cohesive way. It has a special color scheme assigned to it and is the most useful tool for the marketing of your business. Good Logo Design is one of the key ways to establish you as unique in the marketplace. Logo design should be powerful but not overly complex and should make an instantaneous and memorable impact. Many companies offer custom logo design packages that give you a choice of original and unique logo ideas from numerous designers.

It is important to remember the fact that an effective logo design is the one that is made up of three harmonized notes: picture, color palette and font. You should make sure that all these three pieces work together just like a song in which one person sings the low notes, another handles the mid-range and the third sings the high part. These three features enable your logo to give your business an opportunity to build some meaning and symbolism.

Pictures give your logo design a visual meaning in the form of shapes and symbols. For example, leaf may represent nature or health while a circle may represent completeness. The symbol should be unique and memorable. Font represents your company name and it should be legible and readable so that the viewers do not have to struggle to understand the meaning of it. Logo is very important for the reputation of your business so you should not leave such a vital part of your image to chance. Make sure that you do not settle for anything less than a professional font. It really will make a difference in separating your business from your competitors.

Colors represent psychological meanings, each depending on context. For example, red represents urgency as well as passion and love. Therefore, it all depends on the type of message that you want to communicate to viewers, as this will interpret your color scheme.

You have to make sure that all three pieces are singing the same song, which means they must be reinforcing the same message. If you will make these three pieces work together instead of telling the entire business story alone, your logo design will have more sophistication and depth.
