Some pointers to identify an efficient web designer by [Rajkumar Kaushal](#)

Article published on June 13th 2012 | [Web Design](#)

Anyone who decides to start a business should consider developing a website to promote your products. The main advantage of having your own website is that the site will be opened 24 hours a day and 7 days a week, which means it is accessible all the time. To create a website you can hire a web designer with skills and expertise required to develop a site that will attract lot of traffic for your business. The web designer should present a website that acts as a representative to answer all the questions regarding your business and also offers customer service even when the business is closed at night and on weekends.

A web designer should have skills to make your site a powerful and inexpensive advertising and marketing tool. The site should be a great source of expanding your business in other areas or countries. Moreover, a web designer should possess the quality of creating unique websites that help user to reach the goal that one have for making an online presence. It is important that the developer specialize in high quality and professional website design for various individuals and businesses.

The web designer should create a website with optimized website images which means that the file size should be compressed enough to make the size as small as possible without affecting the image quality. This is because the website should not take more than ten seconds to load otherwise people will move away to other fast loading websites. Furthermore, the web designer should avoid using frames as they can create confusions when the visitors want to print a page or mark for reference.

One important fact to remember is that people use internet to search for information so it is vital to provide them with all the points that will complete their search. Good content will help your website to get a good ranking on the net with inbound links and search engine placement. It is the duty of the web designer to include such content on your site that will also help you get a large number of customers as if you are running a business.

A good web designer will strive to create website designer that will directly promote your products to your target audience and also increase sales for your bottom line. The goal should be to make your web experience easy, affordable, pleasant and enjoyable.
