What if you have a computer and high speed data cable, but don't have electricity. What if you have a car but don't have fuel? Similar is the case with the website and web hosting, a website has nothing importance without host service. Web hosting is a type of services which allows the website accessible on the World Wide Web. The hosting companies provide the space on the server on lease or sell that a website needs on the server to get online or visible to users. Suppose you visit to a website and found many down time and low speed and other hosting issue then you would never think to visit that URL. But if you get a site in few minute and found one as more reliable source then you

Generally we need an hosting company that can provide latest features at really affordable prices like lowest down time, Speed, customer support and email hosting, unlimited FTP and more services that is in latest trend. The web hosting companies are easily available in the markets which are providing different types of hosting and hosting plans on the basis of user requirement. Many hosting also providing free web hosting service but a free web hosting is free, but is advertisement supported. Let's take a look that what happen if you go with free web hosting services? First you will not have your own domain, it provides sub domain means the URL contains the name of the hosting company as well for example (yourname.webhost.com) and other thing is Limited web space, Limited band width that means you have less chance to improve in search engine.

Some of the host may allow the client to use separately purchased domains and may operate the domain name registration. Mainly the free webhosts are Linux based servers.

The paid hosting services on the other hand give some more features like

- Unlimited Web Space

- Unlimited Bandwidth

- Unlimited Emails

- Unlimited Sub domains

- Unlimited Domains

- Dedicated IP

A good web hosting service provider like Apoto , is a very essential part of the success of your online business. Choose the hosting company which provides the 100% uptime. The uptime is very important for the website, as it defines whether the visitor comes again or not. The hosting is important factor of any of the website. The hosting makes the website as a part of web world.
