Perfect Wedding Themes for Indian Weddings by [Deepak Verma](#)

Article published on February 11th 2012 | [Weddings](#)

A wedding theme is necessary and heart part of your weddings, when planning your wonderful wedding. Many marriage couples know that they want some special kind of wedding, but they don't know how to integrate that theme into their wedding. Marriage couple wants to celebrate the wedding in such great and unique style that it will be remembered for lifetime. The most new style that has come in fashion to make a wedding ceremony special is a "perfect theme wedding". Mostly, a theme wedding is arranging and affecting every part of a wedding based on a particular theme. Though this style was not popular in India five years back, in new years it has caught the fancy of lots of people. In case you are planning to give your wedding a particular theme, you can go for options like romantic wedding theme, fantasy wedding theme, fairytale wedding theme, royal wedding theme to name a few perfect wedding themes.

Here are some instructions for how you should go for a perfect wedding theme.

The royal wedding theme seems to be the most popular in few year, may be due to the rich royal tradition India passed through till half a century ago. It is not very unusual to book royal buildings or a section of palaces as venues to give the best possible accuracy. Original things, right from the shaped iron gates at the opening to chandeliers to columns to windows and draperies become available to you robotically by booking a royal palace. No need to worry, in case of non availability of royal or legacy buildings, wedding planners can create a artificial royal place your choice depending on your budgets .

Romantic wedding theme is as popular as royal theme with many middle class families however the concept of romantic theme is not very clear in India. In many an Indian wedding I saw, which claim to have romantic theme, it was garden as the place which bring some optimism. However, you can see the true talent of wedding planners when the wedding is at home as they get to decorate more. First off, it is a dash of tons of flowers universally; windows and door panels and draperies vanish to make way for flowers and ferns. You will have mini indoor fountains aimlessly placed inside the wedding hall. Wedding stage will be almost lost in plants and fauna; finally, don't overlook to include a blower to create a cool gust of scented air.

It might be safe to say that virtually all brides start with the idea of a fairytale wedding themes and many brides stay the course. To them, anything short of the full royal insignia, and the coach and cart and castle, amounts to a dream overdue. And nobody settles for a dream deferred on their wedding day.
