Soundcraft Si Compact 32 is a powerful digital mixer with Lexicon effects into a small footprint console. This digital mixer provides a range of features and enough outputs to cope with dual FOH/monitor setups. Si compact 32 mixers contain 32 recallable mic pre amps with 4 stereo returns giving a total of 40 inputs to mix. Each input is equipped with various features like compressors, gates, parametric EQ, High Pass filter and delay.

Si compact 32 console also contains an AES/ EBU input and output socket, 16 analog outputs, 14 aux outputs and 4 mute groups. All Soundcraft Si compact consoles contain buses and output processing that matches the versatility of inputs. All 25 buses on the output contain features such as compressor/ parametric EQ and a BSS Graphic EQ. All Si compact consoles offer four stereo Lexicon FX processors that complement the channel processing and provide various sound and user adjustable parameters.

Soundcraft Si compact 32 digital mixers offers a lot of audio control and processing in an easily portable unit. The most popular features are listed below:

TOTEM (The One Touch Easy Mix): Si compact 32 digital mixers are known as one touch easy mix as any of the aux, FX or Matrix bus can be instantly mixed by just pressing a single key.

BSS GEQ: This feature prevents you from running out of processing and a BSS GEQ on every bus prevents to assign from a pool of resources.

1 Control = 1 Function: There is no layering of controls in Si compact 32 digital mixers as each control is dedicated to a given function. That's why all Si compact controls are labeled on the console just like an analog mixer.

Global Mode Controls: It contains a row of rotary controls above each fader and allows instant access to the core functions.

Soundcraft Fader Glow: It lights up the fader slots with a clear color coding to indicate that whether the fader is working as an FX, stereo, graphic EQ, linked mono, post or pre-fade Aux.

Instant Access Keys: The console contains dedicated keys on the front panel for functions like RECALL, STORE, MUTE, NEXT, TAP TEMPO.

Function Focus: The screen displays information about a particular channel like channel name, number etc whenever a control is moved and Select key is pressed.

Soundcraft Si compact 32 digital mixers offer a lot of benefits but the biggest advantage is its flexibility. Flexibility comes at the cost of usability. This console is portable and easy to use as all the controls are mentioned on the front of the console. LED lights are used on the console to indicate the function mode in the board. Due to its compact size, it can be used in space restricted areas like theatres, small venues, houses of worships etc.

Si Compact 32 digital mixer console has robust digital mixing chops and broad expansion options. That's why these digital mixers are frequently used at various live sound events.
