Buick Cars Get an Update

by Robert Vadra

Article published on August 1st 2012 | Auto

Have you seen the latest Buick cars? Barrie Buick dealer Georgian Chevrolet Buick GMC has an impressive inventory of new Buicks including the Buick LaCrosse, Buick Regal, Buick Enclave, and Buick Verano. The manufacturer has updated the new Buick models with updated styling with luxurious amenities, enhanced safety features, and technology. Below is just a small taste of what you can expect with these attractive new vehicles.

Updated Styling and Luxurious Amenities

One look at these new Buick models and you'll immediately notice the updated styling. With stylish lines, shimmering colours, and striking accents, Buick's new vehicles are a sight to behold. Slip inside and you'll notice luxurious amenities such as contrasting French-seam leather stitching, leather seats, and plenty of legroom.

Enhanced Safety Features

The 2013 Buick Enclave is notable for being the first in the industry to include a front centre airbag. In addition, many new and used cars by Buick feature an ultrasonic rear park assist system that alerts you to objects, structures, and people in the rear when backing up.

Another safety feature now included on many new and pre-owned cars by Buick is the side blind zone alert with cross traffic detection. This is one of those Buick accessories that alerts you to potential objects that you otherwise might not see. In this case, an amber icon flashes in your side view mirror when you are attempting to change lanes and a car has been detected in your blind spot.

Buick Technology Features

Most of the new Buicks come well equipped with technology, too. For example, the Buick Regal features an interactive drive control system that adjusts the suspension continuously for a smooth, responsive ride. You can change the driving modes for daily commutes (standard mode), sport driving (sport mode), and long distance cruising (tour mode). Buick also equipped the Buick Regal and the Buick LaCrosse with its new "eAssist" technology which can improve fuel efficiency by up to 25 per cent.

Other technologies found in new and used Buick cars, including the Buick Verano, include: Intellilink (a touch screen radio), OnStar (for turn-by-turn directions and remote control features), Bluetooth connectivity (for hands-free calling), and a USB port (for accessing your private music libraries).

If you're in the market for new and used vehicles, Barrie's Buick dealership is the place to be. Georgian Chevrolet Buick GMC invites you to see these new Buicks and Buick accessories in person. Stop by for a test drive or see Buick's new vehicles on Facebook.
