Article published on April 4th 2012 | Business

There are several Federal Programs that provide social benefits. The Social Security Disability program is one of the best as it provides assistance to people who have disabilities. The program is governed by the Social Security Administration. The individuals who have a physical or psychological disability and fits in the medical criteria qualify under this program. Anybody who has disability can apply for social security disability benefits. The benefit is provided by disability attorney.

If you are denied on your claim then you can take help from a qualified Social Security Disability Attorney. They can provide you the useful information and help you to get your claim.

How to claim

There are various websites which provides useful information.

Try to get in touch with the disability attorney to enquire the details of the benefits.

Fill up the applying for benefits paper and put down the useful information.

Apply as soon as you have become disabled. Mention whether you are adult or not.

Ask for the Adult Disability Starter kit which will provide answers to the different disability questions.

Check the complete application before submitting it.

Produce your medical records and certificates. It acts as a hard document.

Be patient as the Social Security Administration takes a little time to get in touch with you.

The Benefits

Increase Monthly Income- social Security disability benefits allow you to have a monthly income. The benefits can increase when Social Security cost of living adjustments are made. Generally the monthly income rate from the employer remains the same.

Increased Retirements and Survivors benefits- if there were no earnings for a month or years due to the disability that period of time is included in the calculation. The average will lower after the calculations made.

Tax-free Income- 50% of all Social Security Disability benefits are taxable.

Medicare coverage- only 30% of all employees offer extended medical benefits. Most employees offer COBRA protection on disabilities. Medical coverage includes Hospital benefits and treatment benefits. If added with any other health insurance coverage then benefits will increase the overall protection.

Vocational Rehabilitation- when Social Security approves a personâ€™s disability benefits, a projection is made that the personâ€™s medical condition is likely to improve. This happens when that person participates in the vocational rehabilitation program. Social security benefits continue until the

program ends. If the condition of that person does not improve then the benefits will remain till a trial work period.
