Proper installation of Surveillance devices can lower the risk of antisocial activities by [Ags Tech](#)

Article published on August 18th 2012 | [Business](#)

Increasing crime rates, terror attacks and burglaries are the main reason for installing CCTV Camera in Pune. Shopping malls, public places and residential complexes are more prone to these kinds of antisocial and criminal activities, where security is a major concern. The crime rate has lowered down by installing CCTV Camera in Pune and other major cities.

Before installing cameras for surveillance here are a few things to be considered. Know about your need then decide. Do you need a digital or analog camera? The main difference is in recording of the video files. Digital camera creates file and then save it to the memory. Whereas, analog cameras use VHS technology recorder, in this kind of recording you are suppose to have a lot of blank tapes. So, analog cameras use more space to do the same job. If, you have unlimited recording then digital CCTV Camera in Pune will be the best option.

The use of IP Camera in Pune is on rise for obvious reasons. An IP camera is a modified version of CCTV camera. They have built in browser connectivity by use of which you can access it from anywhere in the world. The video recording is saved in the computer attached with inbuilt digital settings. These recording can be viewed anytime as youâ€™re your convenience. You can keep a vigil on your home, business or factory with much ease no matter where you are, IP Camera in Pune is doing the job for you.

Managing theft is a major concern for all shopping malls; they cannot hire many peoples to keep a strict vigil over the public but they can install IP Camera in Pune and Burglar Alarm in Pune to keep a check. Hiring many people will increase their cost of running but a few men can take care of several cameras. They can monitor the movements of the public and in case any suspicious activity is found. Action could be taken with in time.

Another key issue for shopping malls is the exit points in case of any emergency. Shopping malls are also installing Fire Alarm in Pune in order to react in time. Uncontrolled fire could cause havoc, so a Fire Alarm in Pune must be of sophisticated sensors.

Home Automation in Pune you can control many kind of house hold activities even when you are miles away from your home. You can switch off and switch on lights. Close or open the doors, reply to call bells, take care of your refrigerator, fans, oven and windows. If you have connected your Home automation in Pune to the network, you can even manage it by tablet, smart phone or the computer. Burglar Alarm in Pune and Fire Alarm in Pune can be fitted to make your home more secure and give you a good night sleep.
