Donâ€™t Call Google Chrome Support Every Time, Play Safe and Be Responsible by [Kellymarion](#)

Article published on December 27th 2011 | [Computer](#)

The Internet is an elementary service, nowadays; it has sync the world to a global village, and we are connected as never before. Whether you want to know about a place, ready with academic projects, order favorite wardrobe, listen blockbusters, bank, shop or pay bill, or do more the least pain you have to take is turn on your machine and explore through the browser. And, in no time the browser retrieves the desired information in a quick and easy way. Can you hold yourself from checking e-mails, social update, latest news, and sharing photos, videos, documents and a lot more? Businesses are harnessing it more to access, store, manage and secure their data. Thus, browser is a tool to surpass all boundaries erupting due to natural or artificial boundaries.

Although there are big guns in the market when you speculate the browsing concept, but the simplicity, performance and reliability which Google Chrome has offered is beyond imagination. With built-in malware and phishing protection and autoupdates you can stay protected from malicious Internet threats. Enjoy full-page translation features and access favorite apps, extensions, and themes from the Chrome Web Store. Whether you want to get started with the Google Chrome, learn about its basic features, or fix any problem with it, you donâ€™t need to look anywhere else, just navigate through the Google Chrome Help and get it.

With an administrative privilege you can install Google Chrome browser on your machine in a quick and easy manner. Go through the browser compatibility aspect with respect to the running operating system for hassle-free performance. Your home page settings and browser history will be imported from your default browser automatically. If you are an administrator and want to install the browser with different user accounts then use the alternate installer. Once installed, set your preferences, import bookmarks, copy bookmarks from another browser, choose your home page, pick a theme or make Google Chrome your default browser if it suits you.

Integrate communication tools such as e-mail clients, social network, instant messenger and more with the Chrome browser. All have a self-explanatory setting and configuration wizard, and needs the least follow up. However, issues regarding installation and update, e-mail send/receive, Internet connectivity, webpage display, are quite common. Contact Google Chrome Support to fix those issues or just browse through their rich knowledge source and narrow down the search through given categories. Experts can take the remote access of your system or may instruct you over the phone to perform the troubleshooting and fix Chrome issue.

Chrome Support can also dwell with security issues; experts can guide you to configure the Windows Firewall, update Windows and browser and customize the individual settings pertaining to the browser, e-mail, social network, router and more. Seek advice for browser optimization; in fact, you can do a bit from your end by deleting the browsing history using the wrench icon available on the browser toolbar. Amidst growing Internet threats, be extra careful while banking and shopping, and avoid visiting non reputed sites predicted by the installed security software, and keep your digital assets safe while making maximum of the Internet.
