The Trion Worlds has spent five years in developing the Rift. During the E3 show of the United States, the Rift unveiled the expansion of Storm Legion and the relevant concept map. The Production Director Scott Hartsmann said that the scale of the expansion of the Rift which is scheduled to be launched this fall will be three times larger than the old version.

The main content of the Storm Legion will be about Crusia who will summon the powerful Storm Legion from the lost civilization to fight against the resurrection of Tlana. During this process, she will unveil the lost history of God domain. The content of the expansion will be divided into the following parts.

The new release of the two continents and larger content

The expansion of the Storm Legion will update new stories, unveiling the unknown history of Tlana step by step and leading the players to a different place. The whole content will add two new continents. One is called Dusken, a mainland which the theme is death. Players will fight with the Dragon Ray Gu Los. The other is called Brevane, the cradle of Tlana civilization. In addition to the map expansion, it is expected that the whole game content will expand by three times. At the same time, two new camps will be provided the access to the main city of Xinhai island.

A new soul for each occupation

In addition to the expansion of the contents, the soul talent system of the game will add four souls. Every occupation will have a new soul to use. The condition that every occupation can choose three from eight souls will change. The players can choose three from nine souls. In this way, selectivity and variability of the players will greatly improve. The game play method of the existing spiritual gifts will completely change.

Adding various duplicates

The duplicate will be greatly improved this time. The Rift add seven five-person duplicates and 3 large-scale 20-person duplicates. The players who have not developed the habit of playing with others can enjoy the latest new copy. More evil outsiders and more powerful Boss will enter the market gradually.

A new system for the Grade 60

In addition to the above contents, this expansion will be open the Grade 60 and release more game play methods. First of all, the future game players can adjust their levels at any time no matter whether they are in the wilderness, adventure, or cracks to enjoy the greatest fun of the game. Besides, an independent space which the players and association can freely adjust will be added. With regard to the life skills, game players can lift life skills to the legendary master level. Still, there are more details such as new puzzle, heritage, achievements, mounts, pets, and titles.
