Article published on December 1st 2011 | Education

Child at the age of two always start their education from kindergarten just to make their basic strong and to get acquaint with the environment of school. In preschool, kindergartener learns the fundamentals of counting, measuring, sorting, and number operations and they grasp the things very quickly. It gives a shape in the direction of their further education and leads them to right path. By practicing at home as well as in the classroom, child gets confidence and ability to meet the challenges which come on their way.

Educations program assist child in accessing new educational, financial, social resources in their communities and improve their own lives, the lives of their families and the conditions in their communities. It gives them ability to think in a holistic way and able to take informed decisions about their futures and facilitate to protect themselves from sexual exploitation, HIV and AIDS. When we go one or two decade back and compare the education status with the present status than it would be like poles apart because earlier people were not much bothered about the literacy system but now the condition is reverse.

They are more concerned about acquiring good education so that they can secure their future and lead a contented life. Schools create safe, orderly and supportive environment for students. It has direct effect on childrenâ€™s educational achievement, accomplishment of literacy and scientific knowledge. Formal qualification education is the key to get entry for the higher education for the child. The knowledge and skill is accomplished from classroom teaching. Initially child show tantrums while going to school and they refuse to go to school. The school environment is new for them so they fear going inside it.

Tantrums are equally as common in girls, as in boys. But older kids sometimes resort back to the tantrum stage, especially if thereâ€™s been a recent stress or change in their lives or theyâ€™ve learned they work to get their way. Parents should give them some example and brief them about the benefit of the school. Academics are an important part of studentâ€™s life, but so is education. Academics is the acquisition of skills and information by reading and learning from books, where as education is the gaining of knowledge and wisdom. It makes the students think and wisely step out of problems in life.

School admissions have always been a cause for tension especially in India. Now Onlineschooladmissions.com comes to your rescue. A parent friendly portal, aimed at streamlining the Indian school admission system, OSA is a reputed name in the education circles. OSA understands what parents go through during school admissions and ensure it takes care of your childâ€™s data online and also schedules an interview from a school on your list. OSA doesnâ€™t guaran admissions because each school has different parameters and different tests by which a child is selected. OSA is merely a mediator between you and the school through the convenience of the Internet.
