Five Fingers - Healthy & Sensitive Feet by [Kelvin W. Roll](#)

Article published on May 3rd 2012 | [Fitness](#)

The health consciousness among the people is increasing day by day due to the spread and adverse effect of many diseases. Most of the part of your body is a sensitive organ where you can meet with some accidents or paralyses.

The precautionary actions and the health awareness activities are increasingly found in every corner of the world. The natural treatment and natural medical influences are redirecting people to lead their life in a natural way.

The feet and lower legs are an important part of human body which is enabling our mobility. The strength and health of these parts are so important to keep us moving in our day to day life.

The result of going barefoot is found to be achieving some health benefits than wearing the high heel shoes. The use of five fingers is common among the people to stimulate and strengthen the muscles of feet and lower legs. The risk of constantly wearing the normal footwear is almost reduced by wearing the five fingers where the chances of injury are less. There are various types and purposes of five fingers available for both the men women categories. The arch support and heal stabilization products, ankle guard for inversion, patellar tendon and support etc. are some items in the category.

Considering the sports use, the Vibram FiveFingers KomodoSport is an excellent stitch free product which adds as a second skin to your foot. The Spiridon provides perfect balance to foot and protecting the rugged surfaces. Other branded items include Menâ€™s Komondo Sport, Bikila, Menâ€™s Bikila, Vibram Five Fingers Bikila Shoes for Men, Thigh Wrap with adjustable compression, Womenâ€™s classic Fresca designed for barefoot balance and agility, Womenâ€™s Seeya for barefoot sensation with polyurethane insole protection for skin and foot tissues, Womenâ€™s Seeya, Womenâ€™s FiveFingers Jaya Black Silver etc.

The FiveFingers helps us in improving the range of motion in the ankles, fee and toes areas in a natural way. The importance of neural function to maintain the balance and agility is made functional by the FiveFingers. The stimulated sensitivity function between the feet and brain will make you more agile. The heel lift can cause some problems to you in your total body balance. By wearing the FiveFingers you will be able to evenly distributing the bodyweight and correcting the spinal alignment.

A freedom in your legs will make you more free and easy to move. The flexibility made by the barefooting technology will be an added advantage on your safe and secure mobility. The Vibram FiveFingers are available even in the childrenâ€™s sizes too. The online stores are making you available these products to easily pick your preferred one by online ordering. The size and other specifications are clearly pointed out for you to make a correct buying decision.
