Say Goodbye to Ultraviolet Rays with Beach Umbrellas by [James Blee](#)

Article published on March 2nd 2012 | [Health](#)

Are you a beach lover and spend most of your time relaxing on the beach but are concerned regarding the harmful UV rays and sunburns. Well then why not protect yourself with the trendy and colorful beach umbrellas that are specially meant for outdoor activities. These beach umbrellas protect your skin from the prolonged exposure to harmful UV rays that might lead to skin cancer. Widely available in numerous designs, sizes and styles these umbrellas can accommodate nearly anyone's needs.

Light in weight and handy these umbrellas not only prevent you from sun's rays and heat but also from sudden rain. Apart from this, these umbrellas also serve as a good purpose for claiming your spot on a crowded beach with an area to keep track of your belongings. These umbrellas also diminish your chances of getting those painful sunburns and can even be stored in cars so that there is no question of even forgetting them at home.

Designed with innovation these umbrellas are capable of blocking the harmful ultraviolet rays. beach umbrellas provide a basic protection from sun and hence are made of materials that can block the solar rays from penetrating into your skin. Based on protection factors of sun and ultraviolet just like the sunscreens the material of the umbrella and its weight varies..

They have a fade proof and water resistant fabric that quickly dries them up in case of rains and also increases your umbrella's coverage. These umbrellas are easy to install anywhere on the beach and have a wide canopy. Now you can lie down and relax on sand as long as you wish without getting roasted. Completely eye catching you can even get these umbrellas to match with your swimming costume. Now stop worrying about the suntan and enjoy on the beach with colorful and fascinating beach umbrellas.
