Decorating your home by [Andrew Bourke](#)

Article published on June 6th 2012 | [Photography](#)

There are many ways to decorate your home or work place but these days many of us are feeling the pinch with money being tight a lot of us have to hold back on buying new things for the home or office but there is a great way to brighten up your home or office / workspace or indeed any space you think could do with a touch up and best of all it is very affordable after all we would all like new things we would all like to come home to a house that we have put our own mark on somewhere that speaks to you and the only thing holding most of us back is the price tag well if you do want to brighten up your home or workspace for a great price here is just the thing for you canvas prints, they are cheap can be found very easily and can add a very personal touch to your home I will talk more about all of these aspects as we go on.

Canvas printing has been around for a long time and has always remained very popular across Europe and indeed the world it is true that canvas printing has been very popular for many years but in recent years the canvas print industry has been more busy than ever and there is a great reason for this in recent years the price of canvas printing has come down a lot and this is great for us the consumer this means the same great canvas prints that used to cost a fortune are coming down in price but the quality has improved and one thing is linked to the other you see one of the reasons canvas prints have gone down in price is because of developments in canvas printing for instance the printers that are used these days are much more advanced and provide a better quality image they waste a lot less and have the ability to print much faster meaning the printers can print more orders faster and that is one of the reasons they can pass the savings on to us and I don't know anyone who wouldn't be happy with a better quality canvas print for a great lower price but there are other reasons why the printers do have to sell the canvas prints at a cheaper rate these days and that is because of competition as I have said there have been many advancements in canvas printing and this is also in the use of the printers and cheaper materials so a lot of people out there have started their own canvas printing business so with so many people out there doing it causes them to compete on price and it very quickly drives down the price and that is great for the consumer but as always when this happens some people will sacrifice the quality most people that have been doing this for a long time and are reputable businesses won't do this they stand by their work but with a lot of people jumping on the band wagon you always get some cowboys so make sure when you buy a canvas print it is from someone with a good reputation you can find this out by checking them out reading testimonials from other customers and make sure you get a they will refund you if you are not happy with a bad quality print most people will offer this as standard.
