The guide explains what the 3 store has to offer to customers and the various types of mobile phones available to purchase.

The 3 store offers various mobile phone deals including monthly contracts, pay as you go and SIM only. They also provide mobile broadband dongles, laptops and tablet devices, so you can get all sorts from them.

There are various types of 3 mobile phones available to purchase, including HTC, iPhone, BlackBerry, Nokia, Samsung, Sony Ericsson and LG. Both brand new and refurbished phones are available, so that you can have an option. Refurbished ones allow you to get a better phone for a lower price, as they are simply phones that have been used before or perhaps returned within the first week after sale, but are still in perfect working order. You can buy online, via the phone or at a high street store, whichever you prefer.

3 Pay monthly Phone deals start from around £13 per month and are mainly for Nokia and Samsung models, while the higher end phones go up to over £35 per month, often including Blackberrys, HTCs and iPhones as well as Samsung, Nokia, Sony Ericsson and LG. The more you pay, the better phone you will get and the higher amount of minutes, texts and data plans included in your tariff. It depends completely on what you are looking for, but there are some great deals to be had.

Top of the range smartphones are available, many of which have high resolution cameras for recording videos and taking photos, as well as playing back HD films and video clips. Most of them can also access the internet via both 3G and wifi connections, making them ideal for checking emails or browsing the web whilst out and about. Blackberrys are especially great for business use, but can also have a lot of advantages for personal use, such as BBM.

Most of the contracts on 3 store UK last for 24 months, although there are SIM only deals and pay as you go options if you are unable to commit to that long. Regarding pay as you go, you will have to pay for the phone and top up whenever you need more minutes, texts or internet allowances, but it can be a better option if you do not use your phone that much.

There are some affordable deals starting at around £39.99 for a Nokia C2-01 Black or £49.99 for a Samsung Galaxy Europa Black or Samsung Galaxy Europa White. Other phones can go beyond £150, so it depends what sort of features you are looking for it to have. For example, a Blackberry Bold 9900 is a top of the range smartphone with GPS and wifi internet access, a high quality 5 MP camera with HD video capability, QWERTY keypad and touchscreen and stylish, sleek design. This costs around £449.99. With some great affordable deals, popular mobile phone ranges and a high quality service, it is well worth considering 3 when you need a new phone.
