Reusable Wine Bag Tote Helps Reduce Carbon Footprint by [Amy Jackson](#)

Article published on March 8th 2012 | [Shopping](#)

Wine bag totes are loved all over the States as an effective way to carry your loved beverage during travel or vacation. However by using the reusable wine bags, you can even contribute to decreasing the effect of pollution on the environment. Reusable wine bags made out of natural fabrics are an effective way to reduce your carbon footprint and with the exciting number of designs available, you have nothing to sacrifice. In fact the growing popularity of reusable wine totes is seen as a replacement for its plastic and paper counterparts. Jute, out of which the totes are made, is a plantation crop and thus an easy renewable resource.

Every year all over the world over 500 billion shopping bags are used. This indicates that every minute 1 million bags are being used and discarded. One can thus easily guess the amount of pollution every minute of plastic use contributes to. Photo degradation is not a way of getting rid of polymers as it is a more easy way of adding up to polluting toxics. To be the solution to the cause, we can replace our plastic bag requirements in whatever way possible. During parties and celebrations a lot of gift items are shared. Wine bottles are among the most shared and enjoyed gifts. However they can be packed in reusable wine totes or bags instead of plastic or paper covers. With these customized wine bags one even has the option to select the design suited to the occasion. For corporate and companies, it can be used as an effective tool for promotion.

By going green, you can be an example to the world and this would be appreciated by all. Wine bag totes are reusable alternatives and once taken home can be used for later wine carrying purposes. With the number of beautiful designs that they come in, there is little question whether you would really like a reusable and green bag or not. Forgoing the use of plastic is made easy with these naturally made alternatives.

These wine bag totes also come at very cheap prices, thereby reducing the cost of carrying wine and also as an effective item to give favors. They are green, gorgeous, reusable and cheap. What more can one asked for!
