What are the opportunities for buying used laboratory equipment? by [Todd Viscometer](#)

Article published on May 8th 2012 | [Technology](#)

Universities with limited resources preclude the use of an in-depth research laboratory equipment shortages. Support for used equipment in good condition, except for those schools. However, schools are not the only ones who use the equipment. Private clinics and public authorities on the budget can take advantage of used laboratory equipment.

From the research laboratory on the budget did not sit well wishes of doctors who want to start their own laboratories or expanding your laboratory. It's unfortunate, because the use of laboratory equipment can be purchased brand new equipment for half price. The new desktop Sterilizer / Autoclave, for example, can cost \$ 20,000 and how many more, but you can get a good hand sterilizer for \$ 15,000. This is a big slice off the new price.

Internist gynecologist or obstetrician would require an ultrasound machine or diagnostic test analyzer brand new machines but the prices are too high. The use of laboratory equipment or upgrade costs 75% less than new equipment!

Used ultrasound machine and analyzer can pay for itself and save the cost of diagnostic testing, because you do not have to outsource work. Patients with the one-stop consultation, as going to diagnostic laboratories for routine tests and back to the doctor's office can be frustrating.

Other used or previously owned laboratory equipment such as microscopes, analyzers, homogenizer, packers, washers, lab thermometers, mixers, and lab refrigerators and seller have more items in stock. Even if you are shopping around for used lab equipment, quality and safety for the customer should always be your selection criteria.

Reconditioned lab equipment to give performance when it is the largest, and is equipped with a high level of electronic instruments, and they look like new for at least part of the cost of these promising investments for health care institutions and health care institutions, which require laboratory equipment to their daily lab applications. There, in 2002 models, the various devices that still provides the same performance level when they were bought brand new.

Used furniture laboratory school laboratories or research institutions redesign their own laboratories. Work benches, computer lab furniture, chairs, and shelving units have been refurbished or need updating are sold in several medical and specialty shops and online auctions. Some of them are still under warranty BACK-UPS products.

Shop around and compare brands and prices of used laboratory equipment. You can buy used lab equipment from reputable and established dealers. Before buying your laboratory needs a description and a list that you need for your daily laboratory work equipment. Even if you are shopping around for used lab equipment, quality and safety for the customer should always be your selection criteria. Since this is an important investment for equipment check and review the working conditions of warranty options.

Online vendors provide their own stock lists, but usually they are not included in the price list. You can call them or visit their offices and offer a proposal or ask the other hand laboratory equipment availability.
