Article published on February 14th 2012 | Web Hosting

WHO ARE WE?

All web hosting services are provided by Web2D as a Web Hosting Host, an Australian based company, headquartered in Blackburn North, Victoria. Our company aims at providing a large number of professional services in the following fields of activity: web hosting, domain registration and quality customer support.

OUR MISSION

It may sound unbelievable but the majority of the big companies in the web hosting business usually do not invest much in the development of new technologies. Instead they rely on 3rd party solutions and software. Unlike theirs, our hosting software was created, developed and designed in-house by us. Moreover, our business approach is human-oriented in that our client support is a center factor in the quality hosting service that we offer.

WHAT IS OUR CLIENT BASE LIKE?

Our ready solutions enable small and medium-sized enterprises to gain money from their websites and respective online activities. The online presence in the ever expanding global network allows companies and individuals alike to take advantage of the World Wide Web.

DATA CENTER

The rivalry between the companies engaged in e-business, especially those in the web hosting industry, raised the stakes so high that the choice of an appropriate data center has come to be a crucial factor in the provision of a quality web hosting service. As a valued web hosting client of Web2D you will enjoy all the benefits of our state-of-the-art data centers, located on 2 continents - Steadfast, located in California, USA, and BlueSquare, located in Berkshire, UK.

SERVERS HARDWARE

Beside the well-chosen Data Center, we have achieved another good balance: new and fast servers, which work in perfect synchronicity with our web hosting software: Intel Xeon 2.4 GHz Quad Core, 4 GB RAM, 2x750 GB SATA II Seagate in RAID 1.

DATA BACK-UP

Daily back-up is available to ensure that the web hosting data stays safe.
